visit [www.carbontrust.co.uk](http://www.carbontrust.co.uk)

Hydratec's HydraSave is suitable for new and retrofit installations from dock levellers through to heavy duty goods lifts. The system works by reducing and optimising the current draw of the motor using an inverter, making redundant the star-delta/direct on-line starting systems currently found in most hydraulic lifts.

There are many advantages for Lift Companies and end users alike apart from the obvious cost savings.

Our service includes a full condition report on the hydraulic system prior to installing HydraSave so any additional works can be included. Our standard installation includes the following;

- Valve Overhaul
- Valve adjustment
- Shaft equipment reset
- Floor level set
- Load test

**Customers benefit from longer equipment service life.**

**Lift Maintenance companies benefit from fewer call-outs.**

**Hydratec Hydrasave provides a win-win solution for all parties.**

To find out more about this innovative new product including technical specification and compatibility, please contact Hydratec at any of our three locations.

**Typical (trade) budget prices assuming compatibility with the lift's controller.**

Motor size	Inverter size	Installed cost	ECA Value
7.5KW	17.5A	£3525	£1587
11KW	23A	£3802	£1854
15KW	31A	£4216	£2432
18.5KW	38A	£4648	£3002
22KW	58A	£4976	£3502
30KW	72A	£5289	£3956
37KW	88A	£6432	£4698

#### DISCLAIMER

Hydratec have no relationship with The Carbon Trust. The client is responsible for ensuring any funding is compliant for them individually.

energy saving inverter drive

*ECA compliant  
100% claimable*

Enhanced Capital Allowance allows your clients to claim costs back against their taxable profit

Increase your UPGRADE and MODERNISATION work and save your customer's money; all with one product, the new Hydratec HydraSave, a power inverter solution proven to save energy.

In the current economic climate, saving your customers money is a sure fire way of demonstrating just how great your customer satisfaction levels are. Even better, when you not only offer a tangible cost saving but an improvement in performance, reliability and equipment life expectancy as well!

Over the past year, Hydratec have been developing a cost effective inverter package that can be retrofitted to hydraulic lifts offering savings of around 30% pa.

Installing the new HydraSave will achieve all of the above and because of its power saving ability your clients can even qualify for substantial savings\* against the installation costs through the Enhanced Capital Allowance scheme. It's a win-win for everybody.

\*Qualifying criteria of this scheme must be confirmed by your Accountant.

## Benefits of renewing with HydraSave™
